Empower Them in One Simple Step

Unprotected sex and birth control failures can happen—that's why there's EContra One-Step® (levonorgestrel 1.5 mg tablet)

An **over-the-counter** emergency contraceptive

Convenient, **single-tablet** dosing²

Comparable to Plan B One-Step®

A **low-cost** option for your patients

If your patients wish to use hormonal contraception after taking EContra One-Step, they can do so immediately without any reduction in efficacy³

EContra One-Step Works for Up to 72 Hours (3 Days) After Unprotected Sex²

- ✓ EContra One-Step should be taken as soon as possible to reduce the chance of pregnancy
- ✓ The sooner EContra One-Step is taken, the better it works
- ✓ Not to be used as a regular form of birth control

Let your patients know that they can keep EContra One-Step on hand to feel prepared. Having emergency contraception readily available encourages earlier use, making it more effective.⁴

EContra One-Step® Is the #1 Emergency Contraceptive in US Clinics¹

7 out of 8 women who take EContra One-Step as directed will not become pregnant²

In clinical studies, EContra One-Step—as a single dose of levonorgestrel 1.5 mg—was found safe and effective for emergency contraception when used up to 72 hours (3 days) after unprotected sex⁵

If your patient is inquiring about EContra One-Step, it may be the right time to have a conversation about long-term contraception and reproductive health.
